## ColorCode 3-D Prime™ Glasses

ColorCode 3-D®, anytime, anywhere

US Patent No. 6,687,003 • AU Patent No. 763370 • EP Patent No. 1131658

The new ColorCode 3-D Prime Glasses line consists of two different models, PrimeS™ (Standard frame) and PrimeC™ (Cover Style frame).

C3D PrimeS is designed for a close fit to shield out ambient light and give a large field of view.

C3D PrimeC is designed to fit on top of prescription glasses and at the same time shield out ambient light with a large field of view.

For orders of 5,000 glasses or more there is a possibility to add your message in a custom print and to chose between glossy, matte, or exclusive elastic paint coating.

Each pair of glasses is delivered in a protective cloth bag that can be used to clean the lenses.

The C3D Case™ contains a classroom set-up of 32 glasses, either style. The C3D Case is divided into 32 individual compartments to make it easy to identify if any glasses are missing. 1-2 cases should fill the need for most classrooms, meeting rooms or smaller exhibition and event scenarios.

### Sales terms

Delivery times vary depending on quantities and your preferred delivery method, but be aware that it can be as much as 10-12 weeks. For any order you pay 50% up front and 50% on delivery. All payments are made through International wire transfer. All prices are exclusive of customs, taxes, VAT, and shipping cost. *Ogon holds the right to change the prices without notice.*

	Recommended resell price (EUR)	Minimum order*
PrimeS	10	100
PrimeC	12	100
